Green Growth Remover

Cleans terraces, stone floors and masonry work

Registration No.: N - 28021

PA: 10 Protective agent for masonry work

Range of use

Remmers Green Growth Remover is a special cleaning agent for removing green growth from stone surfaces such as flagstones, masonry work and roof tiles. It can also be used for wood surfaces.

Application method

Apply Remmers Green Growth Remover undiluted or diluted up to max. 1 : 20 with water to the dry substrate (watering can or sprayer) and allow to act for approx. 24 hours.

For a full cleaning effect, the product should not be washed off by rain or rinsed with water during the action time.

If necessary, repeat the cleaning procedure. Remove the dried growth with a hard broom.

Characteristic data of the product

Aggregate state:	liquid
pH value:	(20 °C) undiluted 7.6

Packaging, application rate, shelf-life

Packaging:
1.0 l and 2.5 l plastic containers

Application rate:
Approx. 0.1 l/m² depending on the degree of soiling

Shelf-life:
At least 2 years stored in the original container.

Safety, ecology, disposal

Further information on safety when transporting, storing and handling as well as disposal and ecology is found in the latest Safety Data Sheet.

Notes

We recommend that people with sensitive skin wear rubber gloves.

Use biocidal products safely and responsibly. Always read the label and product information before using.

The statements above are compiled from our field of production and according to the latest technological developments and application techniques.
