

Stoke Mandeville Flexible Block Paved Driveway

Case Study

Cleaning & Sealing Concrete Block Paved Driveway in Stoke Mandeville, Bucks

The homeowner had recently finished a thorough clean up of his patio and pathways, ready for the Summer's entertaining and family BBQ's. NCC Streetscape had advised him on what cleaning and sealing products to use, and he was so pleased with the results that he contacted them again, as he now wanted to do a similar 'clean up' job on his driveway.

As with his patio and pathways, NCC recommended initial jet washing and cleaning with NCC Grime Remover, a powerful and highly effective general cleaner. This was followed by applying NCC Black Spot and Green Growth Remover to remove unsightly 'green growths' of algae, moss and ugly 'blackspots' in the paving surfaces. This was left overnight to penetrate deeply and do its work, then the surfaces were finally jet-washed to restore the original colour of the concrete block paving.

With the driveway clean and looking good again, it was allowed to dry for a few days, then the surfaces were sealed with GftK vdw 950 3-in-1 Stain Protect, a unique, impregnating paving sealer, developed as the ideal solution to provide an effective, protective and stain resistant treatment, for porous paving. This will greatly assist in keeping the driveway looking its best and making future cleaning much easier.
