

## **RESTORE – A - DRIVE**

### **DESCRIPTION**

*Kingfisher RESTORE A DRIVE* will put the colour back into your faded drive/ patio. This revolutionary new product is formulated from a blend of premium resins, light fast pigments, colour enhancers and protective waxes to penetrate into your existing blocks/slabs/kerbs and borders to leave a natural looking finish. With extra surface repellents built into the formulation the product will give you a new look finish for up to 4 years.

### **PREPARATION AND APPLICATION**

For best results follow the following simple 5 step procedure, using *Kingfisher Bio-cidal Wash, Block fill, Restore-A-Drive and Ultimate Topcoat*. (See Leaflet cat 0108-001)

**"SHAKE THE CAN WELL BEFORE USE"**

1. Apply *Restore-A-Drive* to a small discreet area to check colour and compatibility prior to full application.
2. Prepare the surface by pressure washing with a rotary patio cleaner. Once dry, spray the surface with "*Kingfisher Bio-cidal Wash*" solution to kill any latent moss, lichen or green mould spores.
3. If you are looking to fill in the gaps between blocks, then now is the time to brush in our moisture curing sand which will not wash out and will inhibit weed growth.
4. Apply a single coat of *Restore A Drive* to a dry surface by brush or roller. (*Remembering to shake tin before use*)
5. For improving the longevity of the *Restore A Drive* a one coat of *Ultimate Topcoat* can be applied.

### **COVERAGE**

<i>Bio-cidal wash</i>	- 5 litres (makes 25 litres). Approx Coverage 4 sq. metres/ litre.
<i>Blockfill</i>	- 15 kg tub. Approx. Coverage 3 -12 sq. metres/kg (joint 3mm depend on depth)
