

NCC PORCELAIN PROTECT AND ENHANCE

Protective, colour enhancing, wet look, surface sealer.

For Porcelain Paving

External

A low maintenance film forming porcelain surface sealer & protector. Enhances and embellishes the appearance. Highly resistant to wear and stains. Facilitates reduced dirt pick-up, for lower maintenance and easier cleaning.

Directions for use

Preparation:

Newly installed surfaces - ensure the porcelain surfaces are completely clean, dry and free from cement and grout stains (see NCC's Cement, Grout & Salt Remover and NCC Resin Residue Remover).

Existing surfaces - first clean and degrease surfaces with NCC Porcelain Intensive Cleaner and rinse well with clean water. Leave to dry out thoroughly (24 hrs).

Application:

Clean and dry surface – apply 1 or 2 coats using a foam roller, sealant applicator pad or paint brush from a separate container or roller tray. Apply thinly & uniformly to the surface. Allow to dry (approx:1 hr at 15°C). To increase the enhanced appearance an additional coat can be applied at right angles to the first.

Do not over apply in a heavy layer or too many coats, as may be unsightly, and adversely affect slip resistance and/or reduce the efficiency of the product. Porcelain Protect and Enhance dries after about an hour, but will take a further three days to achieve full hardness and become fully resistant. Always test first to establish the correct method of application and optimum number of coats.

Avoid extremes of temperature. Surface temperature range for application between 10°C - 25°C

Coverage

Approximately 30-40m² per litre (one coat) depending on substrate texture.

Aftercare

Routinely sweep surfaces. Mop regularly using **NCC Porcelain Cleaner**. At some stage, (every 2 – 3 years) complete renovation may be desired. In this case use **NCC Resin Residue Remover** to strip the original coating before re-applying. Regular cleaning with steam cleaners, jet washers and strong detergents is usually unnecessary and should be avoided.

Storage information

Store in a cool, dry, frost-free environment. Shelf life- Up to 2 years for un-opened containers.

Health, Safety & Environmental

Keep out of reach of children.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents/container in accordance with national regulations.

This information is offered without guarantee. The material should be used so as to take account of the local conditions and the surfaces to be treated. In case of doubt, the product should be tried out in an inconspicuous area
